PROFILE

I am a complete career shifter,and honestly, I may not have experience in any IT work or anything relevant to the position I am applying for. However,I believe my edge lies in the training I have undergone and the transferable skills I possess. I have taken the initiative to invest in myself and acquired the necessary knowledge and skills through relevant programs. During my training, I have gained a solid foundation in the key aspects of the specific job I am applying for, including HTML, CSS, and JavaScript.This training has provided me with a comprehensive understanding of industry standards, best practices,and the technical know-how required to excel in the role. Furthermore, my previous experience in different fields has equipped me with valuable transferable skills that can be applied to this position.For example, I have developed strong communication, problem-solving, and organizational skills,which are essential in any professional setting. Regarding the other skills necessary for my future job, I believe I am a fast learner and naturally adaptable. I know I can learn the required skills within a reasonable timeframe while working.

EXPERIENCE

Web Page Link :

Business

Skills & Tools :

HTML, CSS, Github, vs code, and other open source online tools

Web Page Link :

Construction

Skills & Tools :

HTML, CSS, Sass, Github, Vs code, & JavaScript

Web Page Link :

Filmoteka

Skills & Tools :

HTML, CSS, Sass, Github, Vs code, & JavaScript

FIRST WEBSITE PROJECT

This is my first website, created as a project to solidify my knowledge of HTML and CSS. I was very excited to learn new skills during this project, and I truly enjoyed the process.This project also taught me how to use Github, VS code, and other online tools to build a website.

CONSTRUCTION WEBSITE

I consider this website that I made as for my first client, and my client is my brother. He is a civil engineer currently working in a construction company based in davao. He has a dream of starting his own construction firm, which is why he requested me to create a website for his dream construction company. Now, this website has the domain name https://construction.ardevaz.tech/

FILMOTEKA

"The Filmoteka project is our JavaScript team project in my boot camp at GoIT Philippines. I led this team project with four member, handling most tasks to meet deadlines. I deligated the presentation to our Scrum Master. I realized that being a team leader demands dedication to prevent project failures."
